Clinical Zoo Vet Position

ZooParc de Beauval is offering a clinical veterinarian position. This position will open on the 1st of July 2020.

ZooParc de Beauval has the largest and most diverse animal collection in France (more than 20,000 animals and 700 species). The new 1400m² veterinary hospital was built in 2016 and includes an 80m² laboratory (incl. biochemistry, hematology, electrophoresis, hormonology, etc.), hospitalization areas, quarantines, necropsy room, treatment and surgery rooms, on-site CT-scan, digital radiology, ultrasonography and endoscopy. The new veterinarian will work with the veterinary staff (4 veterinarians, 1 ECZM resident, 1 intern, 4 vet nurses and 2 researchers), veterinary trainees, animal keepers and curatorial staff.

Candidates are required to:
- Possess a veterinary diploma and licensure for practicing in France.
- Be fluent in written and spoken French & English.

Preference will be given to candidates with:
- Serious previous experience in zoological medicine (preference for ECZM or ACZM diploma).
- Previous research experience and scientific publications.
- Excellent clinical skills and experience.
- Driving license.

Application materials should include a curriculum vitae, letter of intent with a statement of career goals and names and addresses of 3 references (people, including current/most recent employers, who may be contacted to provide reference, before offer of employment, unless specified otherwise).

Applications, as well as requests for additional information should be directed to Baptiste Mulot, ZooParc de Beauval, 41110 Saint-Aignan, France, baptiste.mulot@zoobeauval.com. A response will be given to all applying candidates.
